		Flashing	Battery not detected
		Off	Fully charged or USB cable disconnected
● Blue	System indicator	Slow Flashing	Device operating normally
		Fast Flashing	Device operating abnormally
		Off	Device powered off or in Sleep Mode

## Safety Information

This section provides important instructions for safely operating the HT101. Follow these requirements and recommendations carefully to avoid dangerous situations. Read and adhere to all instructions before using the device.

To prevent mechanical damage, transport the device in impact-resistant packaging. Before use, position the device so that the LED indicators are visible. The LED indicators display the device status.

Do not disassemble the device. If the device is damaged, the power cables are exposed, or the isolation is damaged, disconnect the power supply before handling.

Protect the device from water and excessive humidity.

All wireless communication devices may generate interference that could affect nearby electronic devices.

WARNING! Do not install or use the HT101 in a manner that distracts the driver or interferes with vehicle operation.

Installation and/or handling during a lightning storm is prohibited.

Do not dispose of batteries with household waste. Dispose of damaged or depleted batteries at a designated recycling facility or battery collection point.
